INTRODUCTION

Publication of these abstracts was prompted by requests from South Dakota businesses and governmental divisions for updated information on South Dakota and it's communities. Abstracts are prepared for the state, for each of the sixty-six counties within the state, and for cities which had a population of 500 or more in 1980. Upon request by the Division of State and Community Development, Governor's Office of Economic Development, selected cities with a 1980 population of less than 500 are included.

This publication contains three tables and three appendices. Table I contains an abstract for the state of South Dakota. Table II contains the sixty-six individual County Abstracts. Finally, Table III includes 127 individual Community Abstracts.

Appendix A lists the sources used to compile the data included in the abstracts and Appendix B is a glossary of terms. The glossary defines various terms and further explains their application in the abstracts. An explanation of symbols used is also located in the glossary. Appendix C contains three selected maps for South Dakota.

Information included in this publication was compiled and organized by Judy Lohmar, Graduate Assistant, State Data Center. Comments on the South Dakota Community Abstract are expected and appreciated. Please direct any comments, suggestions or recommendations to the State Data Center, University of South Dakota, 414 E. Clark, Vermillion, SD 57069.

APPENDIX B

Glossary of Terms and Explanatory Notes

APPENDIX B

Glossary of Terms and Explanatory Notes

Symbols Used

[--] - The information does not exist.

[N/A] - The information exists but is not available due to federal and state law confidentiality requirements.

[N/R] - The information exists but has not been reported.

Definitions and Explanatory Notes

Average Daily Membership - Average daily membership pertains to the average number of students enrolled per day in the school district. The A.D.M. for K-8 summed with the A.D.M. for 9-12 may not equal the total A.D.M. due to rounding.

Average Family Income - The average family income is the amount obtained by dividing the sum of the total income of persons 15 years old and over by the number of families in the population.

Births - The number of births are by the mother's county of residence. The birth rate is determined per 1,000 population in the county.

Building Permits - Building permit statistics are based on annual reports submitted by local building permit officials in response to a mail survey.

Offices and Mercantile Buildings - This building permit classification includes offices, banks, professional buildings, services stations, repair garages, stores and other mercantile buildings.

Hospitals, Public Works, and Schools - This building permit classification includes hospitals, institutional buildings, public works, utilities, schools and other educational buildings.

Other Non-residential Buildings - This building permit classification includes amusement and recreational buildings, churches and religious buildings, and other non-residential buildings.

Business Establishment - A business establishment is a single physical location where business is conducted, or where services or industrial operations are performed.

Civilian Labor Force - The civilian labor force includes all persons 16 years old and over, classified as employed or unemployed. Persons not in the civilian labor force include those persons on active duty with the United States Army, Air Force, Navy, Marine Corps or Coast Guard, as well as persons 16 years old and over who are not in the labor force.

Deaths - Place of death is determined by the county of residence of the deceased. The death rate is per 1,000 population.

Divorce - The number of divorces are determined by county of occurrence. The divorce rate is per 1,000 population.

Education Level Completed - Education level completed refers to the highest grade successfully completed. This applies to progress in schools defined as a nursery school, kindergarten, elementary school, and schooling which leads to a high school diploma or a college degree. Schooling in trade or business schools, company training, or schooling obtained through a tutor is included only if the course credits were regarded as transferable to a regular elementary school, high school or college.

Employed - Those persons classified as "employed" include all civilians 16 years old and over who are either "at work" or "with a job but not at work". "At work" persons includes a) those who did any work at all during the reference week as paid employees, b) those who did work in their own business or profession, or on their own farm, or c) those who worked 15 hours or more as unpaid workers on a family farm or in a family business. Persons who are "with a job but not at work" include those who did not work during the reference week but had jobs or businesses from which they were temporarily absent due to illness, bad weather, industrial dispute, vacation, or other personal reasons.

Expenditure - An expenditure is the act or process of paying out.

Government Expenditures - Government expenditures include all amounts of money paid out by a government, other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. This includes only external transactions such as the provision of perquisites or other payments in kind. Government expenditures are net of recoveries and other correcting transactions.

Total Expenditures for Education - Total expenditures for education include expenditures for instruction, support services, community service, non-programmed debt service and co-curricular activities for the general fund and the special education fund.

Family - A family consists of a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. All persons in a household who are related to the householder are regarded as members of his or her family.

Family Income - Family income is the combined incomes of all family members 15 years old and over.

General Obligation - General obligation pertains to bonds issued for any authorized corporate purpose.

Household - A household includes all the persons who occupy a housing unit. A housing unit is a house, an apartment, a group of rooms, or a single room that is occupied (or if vacant, is intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live and eat separately from other persons in the building and have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements.

Household Income - Household income includes the income of the householder and all other persons 15 years old and over in the household, whether or not related to the householder.

Income - Income is the algebraic sum of the amounts reported separately for wage or salary income; nonfarm net self-employment; farm net self-employment income; interest, dividend, net royalty or rental income; Social Security or Railroad Retirement income; public assistance or welfare income; and all other income.

Receipts from the following sources are not included as income: money received from the sale of property (unless the recipient was engaged in the business of selling such property); the value of public housing subsidies, medical care, employer contributions for pensions, etc.; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the household; gifts and lump-sum inheritances, insurance payments, and other types of lump-sum receipts.

Industry - An industry is a distinct group of productive enterprises. The industry classification system consists of 231 categories classified into 13 major industry groups. It has been based on the "Standard Industrial Classification Manual" (SIC).

Long-Term Debt - Long-term debt is debt payable more than 1 year after date of issue.

Marriages - The place of marriage is determined by the county of occurrence. The marriage rate is per 1,000 population.

Median - The median is the value that falls in the middle when a group of values are arranged in ascending order.

Median Age - The median age is the number which divides the distribution of ages into two equal groups, one including ages above the median and one including ages below the median.

Median Family Income - Median family income represents the median income for 4-person families in state abstract only. For counties and communities family median income represents the median income of all families in the area regardless of family size, including those with no income.

Median Income - Median income is the amount which divides the distribution of incomes into two equal groups. One group represents those with income greater than the median and the other group represents those with income less than the median. Total number of units in the distribution includes those with no income.

Occupation - An occupation is an activity in which one engages. The occupation classification system consists of 503 specific occupation categories arranged into 6 summary and 13 major occupation groups. This classification was developed to be consistent with the "1980 Standard Occupational Classification Manual" (SOC). The primary principles used in classifying occupations are: 1) the classification should realistically reflect the current occupational structure of the United States, and 2) an occupation should be classified on the basis of work performed.

Occupied Households - A housing unit is classified as occupied if it is the usual place of residence of the person or group of persons living in it at the time of enumeration/estimation, or if the occupants are only temporarily absent; e.g., away on vacation. The number of occupied households in 1985 for counties and state are provisional estimates.

Per Capita Income - Per capita income is the mean income computed for every man, woman, and child in a particular group. It is derived by dividing the total income of a particular group by the total population in that group.

Persons by Age - The number of people in the 1970 age groups was derived from two sources, one containing one-hundred percent count information and the other containing sample data. Therefore, the number in all 1970 age groups combined may not add up to the total population for 1970.

Revenue - Revenue may be income from an investment or money collected by a government.

Government Revenues - Government revenues include all amounts of money received by a government from external sources, other than from issue of debt, liquidation of investments, and as agency and private trust transactions. This excludes noncash transactions such as receipt of services, commodities, or other "receipts in kind." Revenue is net of refunds and other correcting transactions.

Total Revenues for Education - Total revenues for education are those revenues generated through local, county, state and federal taxes. Some school districts may receive other sources or pensions, however those sources are not included here.

Revenue Bonds - Revenue bonds are issued for a variety of public purposes including parks and recreation, swimming pools, gymnasiums, community playhouses, utility systems, telephone systems, parking facilities, auditoriums and housing agencies.

Sales Tax License - A sales tax license is a permit granted to persons, partnerships, corporations, or other organizations selling, renting, or leasing taxable items or performing taxable services in South Dakota. Applicants must obtain a sales tax permit for each place of business.

Special Assessment - Special assessment refers to bonds that are primarily used to finance public improvements such as streets and alleys, sidewalks, water supply systems, sewer systems, combined sewer and waterworks, municipal parking facilities and public convention halls.

Taxable Sales - Taxable sales are the portion of gross receipts of businesses, persons, or organizations who sell, lease, or rent tangible personal property or perform taxable services at retail in South Dakota upon which a sales tax is imposed.

Unemployed - Those persons classified as "unemployed" include all civilians 16 years old and over who are a) neither "at work" nor "with a job but not at work" during the reference week, b) have been looking for work during the last 4 weeks, and c) are available to accept a job. Also included are persons who did not work at all during the reference week and are waiting to be called back to a job from which they have been laid off.

Unemployment Rate - The unemployment rate is the percentage of people in the civilian labor force who are classified as "unemployed".
